DO NOT UNPLUG ANY COMPONENT OF THE TEACHER’S STATION!
For aid, please contact the ED Tech Center in HH0210 or call 42541.

Crestron Panel Instructions
To start, press POWER on the Crestron panel to turn the projector on and off. Press only once and allow a few seconds for the system to turn on (or off). Once the projector is on, choose your desired presentation mode by pressing the labeled button:

- PC (the instructor podium computer)
- Doc Camera (Elmo Document Camera)
- Laptop (if you have your own)
- DVD
- VCR

A selected source will have a red light under it.

DVD/VHS
Press the DVD or VCR presentation button on the Crestron panel. DVD menus can be navigated using the buttons in the lower right hand corner of the Crestron panel. To insert a DVD or VHS movie, locate the DVD/VHS player inside the instructor workstation.

Elmo Document Camera
The document camera can display any printed material on the LCD screen. To display, locate the document camera (on the workstation or in a drawer on the workstation), and press the power button. Press the DOC CAMERA button on the Crestron panel.

Promethean Interactive Whiteboard
To use the Promethean Board, use the Promethean remote on the podium. Press the power button on the remote and wait for the system to turn on (it will take a few seconds for the projector to heat up). The Promethean Board will display what is on the computer screen, so ensure that the PC presentation button on the Crestron panel is selected.

Audio Volume
Audio volume for the PC and DVD/VHS sources can be controlled with the VOLUME turn knob.

Please LOG OFF from the computer when you are finished and DO NOT SHUT DOWN. Remember to TURN OFF the projector when your class is complete by pressing the POWER button on the Crestron panel. Remote controls are not needed with the system. If you require a remote, please visit the ED Tech Center for assistance.
