Crestron Panel Instructions
To start, press START and then PROJECT on the Crestron panel to turn the projector on. Press only once and allow a few seconds for the system to turn on. Once the projector is on, choose your desired presentation mode by pressing the labeled button on the touch screen:

- **Computer** (the instructor podium computer)
- **Document Camera**
- **Laptop** (if you brought your own)
- **DVD**
- **Auxiliary**

**DVD**
Press the DVD or VCR presentation button on the Crestron panel. DVD menus can be navigated using the sub menu in the Crestron panel. To insert a DVD or VHS movie, locate the DVD/VHS player inside the instructor workstation.

**Elmo Document Camera**
The document camera can display any printed material on the LCD screen. To display, locate the document camera (on the workstation or in a drawer on the workstation), and press the DOCUMENT CAMERA button on the Crestron panel.

**Audio Volume**
Audio volume for the PC and DVD/VHS sources can be controlled within the VOLUME sub menu, found by pressing the Volume button on the Crestron panel.

Please **LOG OFF** from the computer when you are finished and **DO NOT SHUT DOWN**. Remember to **TURN OFF** the projector when your class is complete by pressing the FINISH button on the Crestron panel. Remote controls are not needed with the system. If you require a remote, please visit the ED Tech Center for assistance.
